

CKA/CKAD : Complete Certification Guide

Service Type: Load Balancer

CKA/CKAD Certification

- Node Port service Open the Port on Worker Node. It exposes the Service on each Node's IP at a static port.
- Challenge with Node Port -
 - User needs to access Service via **IP/DNS:Port**

CKA/CKAD Certification

- Load Balancer Service Type exposes the Service externally using a cloud provider's load balancer.
- NodePort and ClusterIP Services, to which the external load balancer routes, are automatically created.
