# CKAD : Complete Certification Guide

Assignment : Create, Modify, Build Docker Image

CKAD : Certification

➢ Create your own DockerFile -
  ○ Get the latest Python3 docker image from Docker Hub.
  ○ Write a Simple Python Program or Download any basic Python Program from Internet.
  ○ Bake Python program inside your image and Run it on Default on container Start.
  ○ Tag and Push your Image to Docker Repo.
  ○ Execute your Custom Image container on Kubernetes.

Thank You...
