# CKA/CKAD : Complete Certification Guide

## Label Selector in Kubernetes

certified

kubernetes

CKA/CKAD Certification

➢ **Selectors** : Using Label selector, the client/user can identify a set of objects.

➢ Select Objects from Pool using label.

```
kubectl get pods -l key=value
```

```
kubectl get pods --selector key=value
```

Command Line

K8s Objects

K8s Objects

Services

```
…
spec:
  selector:
    app: MyApp
```
